

The
Oy Ling Chun
Science
Center
at
St. Rose of Lima School

Please select a contribution opportunity that matches your interest. Also, please consider seeking matching funds from your employer—they double the impact of your gift and help us reach our goal faster! Thank you for your interest in St. Rose of Lima School and your generous support of the Oy Ling Chun Science Center.

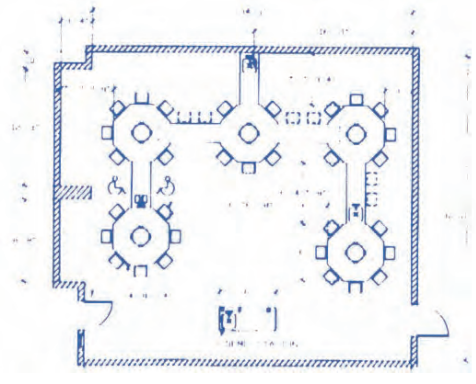

- Yes, I would like to help build the Oy Ling Chun Science Center by making a contribution to the St. Rose of Lima School Oy Ling Chun Science Center Fund.
 - Donor: \$100
 - Friend: \$250
 - Patron: \$500
 - Benefactor: \$1,000
- I choose to make my donation in the amount of \$_____.

Checks payable to: St. Rose of Lima School/Oy Ling Chun Lab

Please provide the following information so that we may periodically update you on the progress of the Oy Ling Chun Science Center renovation.

Name: _____
 Address: _____
 City/State/Zip: _____
 Phone #: _____
 Email: _____

Please return contribution and information to:
St. Rose of Lima School
52 Short Hills Avenue, Short Hills, NJ 07078

The Oy Ling Chun Science Center is a memorial to our science teacher, who passed away in late December, 2005. The middle school science teacher at St. Rose for 6 years, Ms. Chun was beloved by her colleagues, students and school families for her kindness, love of science, and devotion to teaching her young students. The goal of renovating and updating the science lab began with Ms. Chun, and now that she is gone, the determination to see that vision realized in her honor is stronger than ever.

The Oy Ling Chun Science Center will be outfitted with a teacher demonstration area at the front of the classroom; multi-student "Barbell" lab tables will run perpendicular to the teacher's area, affording all students an unobstructed view of lessons and demonstrations. Each lab table will be equipped with 2 sinks and electrical stations.

New storage and display cabinets will be installed to house microscopes, distilling apparatus, hot plates, test tubes, flasks, beakers and other supplies for lab activities and experiments. New curricular materials in chemistry, biology, physics and astronomy

will be purchased to take full advantage of the lab's capabilities. As safety in the lab is of paramount concern, a safety shower and eye-wash station will also be located in the lab.

The latest computer technology for the classroom will be an integral part of the Oy Ling Chun Science Center, as well. Four to five computer stations where students can do simulated lab activities will be installed. A SMART board that networks with the lab computers and laptop will aid the transmission of lessons and lab work between the teacher and the students.

The Oy Ling Chun Science Center will be a well-planned, well-built, fully equipped facility that will provide St. Rose of Lima students the opportunity for an unparalleled grade-school science education. The total cost of the renovation will be \$100,000. We ask you to help us undertake this important renovation project with your donation to the Oy Ling Chun Science Center Fund.
